

# CAPSTONE PROJECT: BATTLE OF THE NEIGHBORHOODS, JAKARTA

## *Jakarta Food Lover Recommendation*

### I. PURPOSE

This document provides the details of work of Capstone Project IBM Data Science Certified program.

### II. BACKGROUND

Jakarta is capital on Indonesia with a population of 10,075,310 as of 2014. A population with mix of cultures – Arab, Chinese, Javanese, Malay, Indian and European – has influenced its architecture, language and cuisine. With more than 200 districts (“kecamatan”) combine with regular traffic jam anywhere in the area, recommendation system would be beneficiary for visitor or traveler to save time during Jakarta visit.

The goal of this project to provide a data driven recommendation that can supplement many website and YouTube video. This report utilized data provided by Jakarta open data, geopy, FourSquate API venue.

Jakarta multi-cultural background providing variety of restaurant reflecting dishes from many provinces and international. For the food lover it would be ideal to have food recommendation system on each neighborhood.

### III. TARGET AUDIENCE

Hundreds of thousand traveler visit Jakarta every year. Many of them are International traveler specifically from Citizens from dozens of countries, including China and Australia. While visiting Jakarta many would find fine Indonesian cuisine from all over the neighborhood.

Recommendation with a high rating customer rating would be benefit for them to enjoy surrounding neighborhood.

## IV. DATA ACQUISITION

This report using data acquire and compile from following website:

- Jakarta Open Data, <http://data.jakarta.go.id/>
- Indonesia Province, district, subdistrict and postal code.
  - <https://github.com/edwin/database-kodepos-seluruh-indonesia>
- Goeocoding Web service to extract the location of each subdistricts
  - <https://geopy.readthedocs.io/en/stable/>
- Foursquare

## V. DATA PROCESSING

DKI Jakarta consists of 1 44 districts and 267 sub-districts. In 2017, the population is estimated to reach 10,333,926 people with a total area of 664.01 km<sup>2</sup>

### Data Cleanup and Visualization

The retrieved contains some un-wanted value and needs some cleanup. In this step data was

- Check again missing values
- Translate column header to English

Data cleanup and grouped.

	Subdistricts	District	Regency	Province	PostalCode

## Data Visualization

Cleaned Jakarta neighborhood data then merge with coordinate of each area. Geo location web service provided latitude and longitude of the area.

## FourSquare Food Venue Rating

Foursquare API providing Score rating for each venue base on venue ID. Unfortunately, free version retrieved max 500 request per day only. Therefore, data was retrieved in span of days then combined. However, only 35% of Jakarta venue retrieved.

Sample of retrieved venue and score.

Completed list of top venue score in Jakarta can be found on dataset directory.

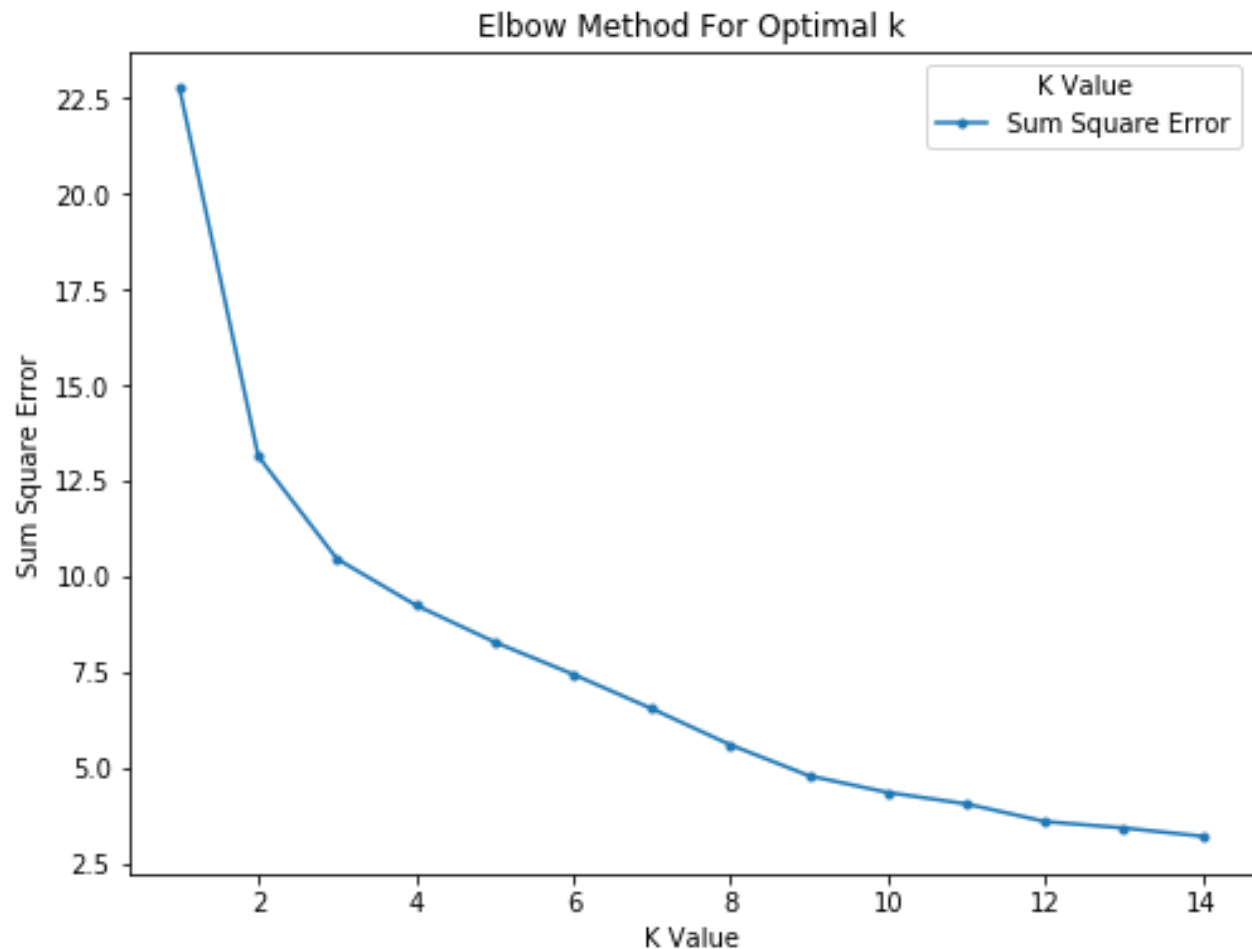

<https://github.com/courseralab/ds-capstone/tree/master/dataset>

## VI. JAKARTA AREA CLUSTERING

Using the Foursquare API to get the most common venue categories in each neighborhood. The data then group and cluster per most venue per neighborhood.

Simple K mean machine learning algorithm use to group neighborhood to number of clusters. Optimal k number use elbow method by calculating the sum of square error of each feature. K from 1 to 17 was scanned. Ideal K for this iteration would be 4.

Jakarta food venue divided to 4 clusters. Folium Map visualization below :

## VII. CONCLUSION

Recommendation based on top 100 food venue in Jakarta has been presented above. Jakarta multi-cultural background population would be perfect for food lover who want to experience many types of food.

Jakarta neighborhood segmented to 4 cluster based on recommendation of machine learning algorithm. On cluster 1, Indonesian restaurant dominate top venue, bakery for cluster2, coffee shop for cluster 3, and chinese-japanese-noodle house on cluster4.

Top rating venue like Menteng Steakhouse and Gelora American Restaurant included in Cluster 4. All of this venue received score 8.9 and up.

I have collected around 35% top ranking food venue in Jakarta due to limitation of free version of Foursquare API. The result might significantly different from presented above when using full version.

Thank you,

M. Rahim
